Frontend Engineer

Top Skills

- JavaScript (Node), TypeScript, Html, Css, Python, React, Next.js, Tailwind, tRPC, Zod, Drizzle
- Mariadb, MySQL, Linux, Linux Server, Self Hosting

Work Experience

Manifold Labs / Frontend Engineer

January 2025 - PRESENT

Built and maintained production web applications across targon.com, manifold.inc, and tao.xyz, where I was primarily responsible for delivering user facing features and admin features / internal tooling. Developed frontend functionality using Next.js, TypeScript, tRPC, and Tailwind CSS, integrating both internal APIs and external services. Designed and implemented backend endpoints within Next.js, also collaborating with and consuming a Go-based API. Built a cryptocurrency payment processor microservice in Python to accept payments on the Bittensor network, enabling crypto-based transactions. Worked across the full stack, contributing to system design, API integration, and deployment of production features.

Elite Home Inspection Group / Full Stack Engineer

July 2024 - January 2025

I designed, engineered, and deployed to elitehomeinspectgroup.com. A platform that allows users to learn about the business, make home inspection appointments, make payments, and receive inspections. It also allows the business to manage appointments, manage availability and manage the client pipeline.

Ingles Directo English School / Owner and Teacher

November 2023 - July 2024

As a fluent Spanish and English speaker I created my own language teaching business with over 50+ students. I was responsible for lead generation and advertisements/marketing. Teaching was among my primary tasks along with forming solid client relationships.

Connexus Resource Group / Team Manager

December 2022 - November 2023

In this role I was responsible for managing 20 plus customer service representatives. I tracked and reviewed the metrics of each employee and worked with them on ways to improve and deliver a higher level of customer care.

Education

Meta Front-End Developer Specialization / <https://coursera.org/verify/professional-cert/PT55MPYYDHHG>

Skills: JavaScript, React, Front End Development

IBM Back-End Development Specialization / <https://coursera.org/verify/professional-cert/QKS5CF7ZVDHG>

Skills: Linux, Python, Back-End Development

Projects

Inglés Directo Platform

inglesdirecto.com / github.com/brighamdent/inglesdirecto-site

Developed an online platform for English teaching that lets client enrollment and subscription management. Developed with TypeScript, React, Axios, Tailwind, Firebase for authentication, and Stripe for secure payments.

Cube Quick

cubequick.com / github.com/brighamdent/Rubiks-Cube-Timer

I built Cube Quick, which is a Rubik's Cube timer and speed solve trainer using React, Vite and standard CSS. The app features a WCA-compliant scramble generator, a spacebar-triggered timer, and tracks solve statistics, including averages. Users are able to review previous solves and manage multiple sessions for an enhanced experience.
